# Perspective of the Independent Consultant

- PT is experiencing explosive growth internationally
- This demonstrates the success of the ILAC Mutual Recognition Agreement

# But in very general terms....

- Its good for consultants!
- There are few people who have experience with interlaboratory comparisons, and most of them work for a PT provider or accreditation body, and do not consult.
- Accreditation bodies and laboratories have limited resources available for PT.

# My Background in PT - CAP

- 1981-1995, College of American Pathologists (CAP) – world's largest PT provider, all areas of medical testing (My first guidance in statistics for ILC –

# First Global Perspective - Europe

- 1997-2001 attend EEE-PT as guest (EEE=Eurachem, Eurolab, EA)
- 2 meetings/year, discuss all areas of PT, all EEE countries
- See that all technical issues, except calibration, are similar to medical issues

# Growth in demand for PT is motivated by global trade

- How to trust results from labs in a different country?
- Need a reliable system of 3<sup>rd</sup> party attestation of competence
- Need to trust the recognition system
- Set up a system that is difficult but achievable; also transparent and verifiable by any stakeholder.

# ILAC Co-operations

- Mutual Recognition Arrangement between 58 optical Reco
