Inside the LEAK cloud chamber

Interaction with industry is an equally important part of the project – not creating spin-outs but working with companies who use the chambers to get their new instrumentation characterized and there are around 20 successful collaborations all over Europe already. Hartmut argues that this is particularly beneficial for small and medium enterprises (SMEs), many of which are advancing innovative measurement technology and consultancy companies for air pollution cases. Hartmut says: “We have a programme called transnational access, where you can become a certified user of the chambers. If you are successful, you can use the chamber and be supported under the
