Fundamental questions  
Elemental answers

# Manuscript accepted? Congratulations!

It is now time to choose your article licence. Corresponding authors from this institution can make articles gold open access at no cost, because your institution has already paid the article processing charge.

**To take advantage of this, click the link in your acceptance email and follow these steps:**

## Step one: go online

---

Your link will take you to this web page.

Your name should be listed as the corresponding author.

Scroll to the bottom and press start now.

## Step two: pick your route

---

Our system will automatically identify you as being from a Read & Publish institution based on your email address.

Select gold open access and press continue.

## What happens if I select standard publication?

If you pick standard instead of gold open access, you can continue, but bear in mind that your article will only be accessible to readers who subscribe to your chosen journal.

You have selected that you don't wish to comply with your institute's preferred mode of publication (provided at no additional cost to yourself through your institute's Read & Publish agreement with us). Please confirm that you wish

### Step three: sign your licence

If you picked gold open access, you will only be shown relevant licence options.

Check the full terms of each licence.

Once you are happy, agree to your preferred option and press continue.

The screenshot displays the 'SIGN YOUR LICENCE ONLINE' page from the Royal Society. It features two columns for different license options: 'CC BY' and 'CC BY-NC'. Each column lists permissions such as 'copy and redistribute the material'. Below the permissions, there is a section for the user to agree to the terms, with a 'CONTINUE' button at the bottom.

## Unanswered questions?

---

If you have a question about any of the steps covered here, or a question related to our Read & Publish scheme, please don't hesitate to ask.
