

Use research to identify and analyse a problem or issue and interpret the results from your data to develop and justify a model of best practice or to evaluate

B: Personal Responsibility

Exercise personal responsibility in planning and implementing tasks according to prescribed protocols

B1: Work out how and when to escalate appropriately and recognising limits of scope of practice.

When working on projects or other practical tasks, you are responsible for the safe and effective completion of procedures associated with your role, within prescribed time frames. You will be expected to be able to identify and describe the limits of your role and to seek advice from your supervisor or others and where to escalate.

B2: Take responsibility for safe and sustainable working practices and contribute to their evaluation and improvement.

When applying for a role, you will be expected to take responsibility for working safely and

B3: Take responsibility for the quality of your work and also enable others to work to high standards.

This means that you can check how you are one of the quality standards expected for the work being carried out by you and others. You should be able to describe an example of how you enable these standards and ensure that they are met.

C: Interpersonal Skills

C1: Show initiative in identifying and using appropriate communication skills

When working on projects or other practical tasks, you are an effective communicator. The example can be through communication and problem solving.

C2: Be able to work effectively with others in a range of settings

This means that you can work with others in a range of settings and be able to interact with colleagues in a range of settings, such as in a meeting. In these situations it

Demonstrate a personal commitment to professional standards:

F1: Comply with and promote relevant codes of conduct and practice.

This means that you will observe as a principle of behaviour, comply with a code of conduct (in the form of a Code of Practice) and will also 'promote all relevant legislative, regulatory and local requirements.

F2: Maintain and enhance competence in your core profession through professional development activities.

The RSC is committed to the continuous professional development (CPD) of its members. We are proud to be a part of the RSC's commitment to 'low-yield, high-impact' CPD activities that are relevant to your practice and efforts to enhance your professional skills. CPD is primarily a user-led learning, professional activity, formal/educational, self-directed learning.

(Note registrants will need to comply with the Science Council CPD Standards)

(Approved by Science Council Board, Sept 2020)
