What are the solutions?

Urgent and concerted action is required now to protect the environment and human health from CECs. The sources of CECs are diverse and complex, involving many stakeholders. The RSC is therefore calling for coordinated action across four key areas to stem the tide of CECs entering waters.

The UK government and regulators must act now to protect the environment and human health from CECs. The RSC is therefore calling for coordinated action across four key areas to stem the tide of CECs entering waters.
