

# General statistics on chemistry students and staff at UK higher education institutions

## Student numbers 2012/13 to 2021/22

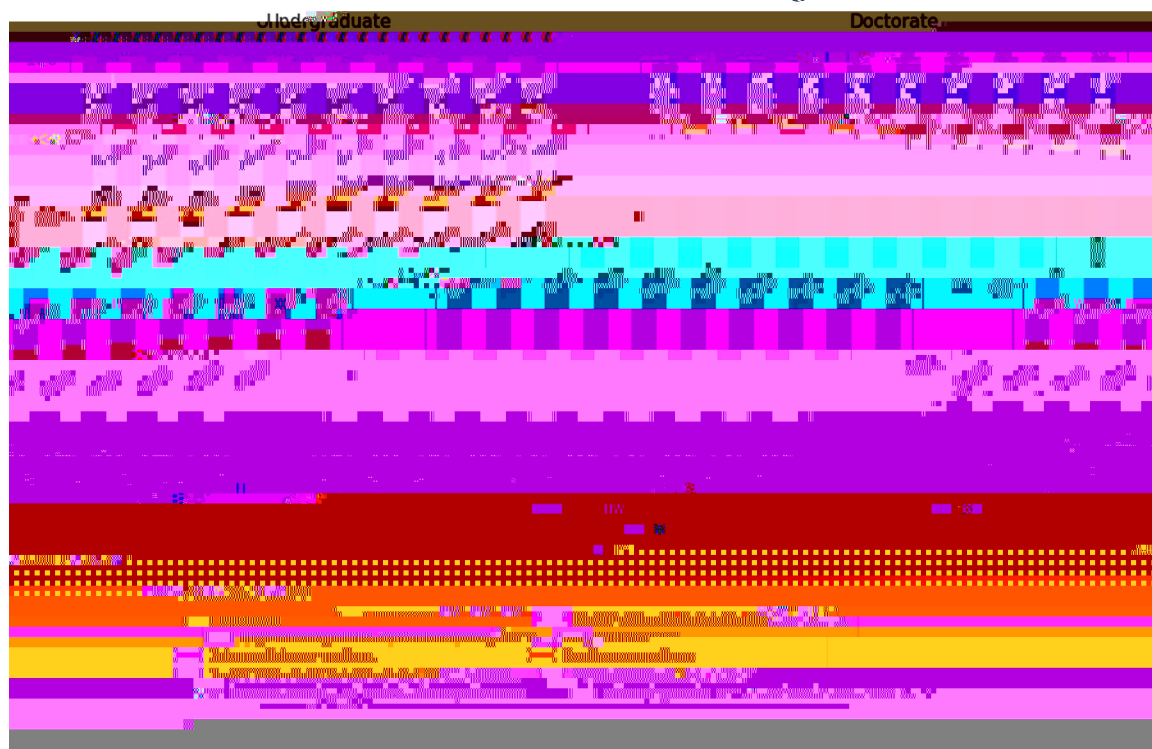

## Staff numbers 2012/13 to 2021/22

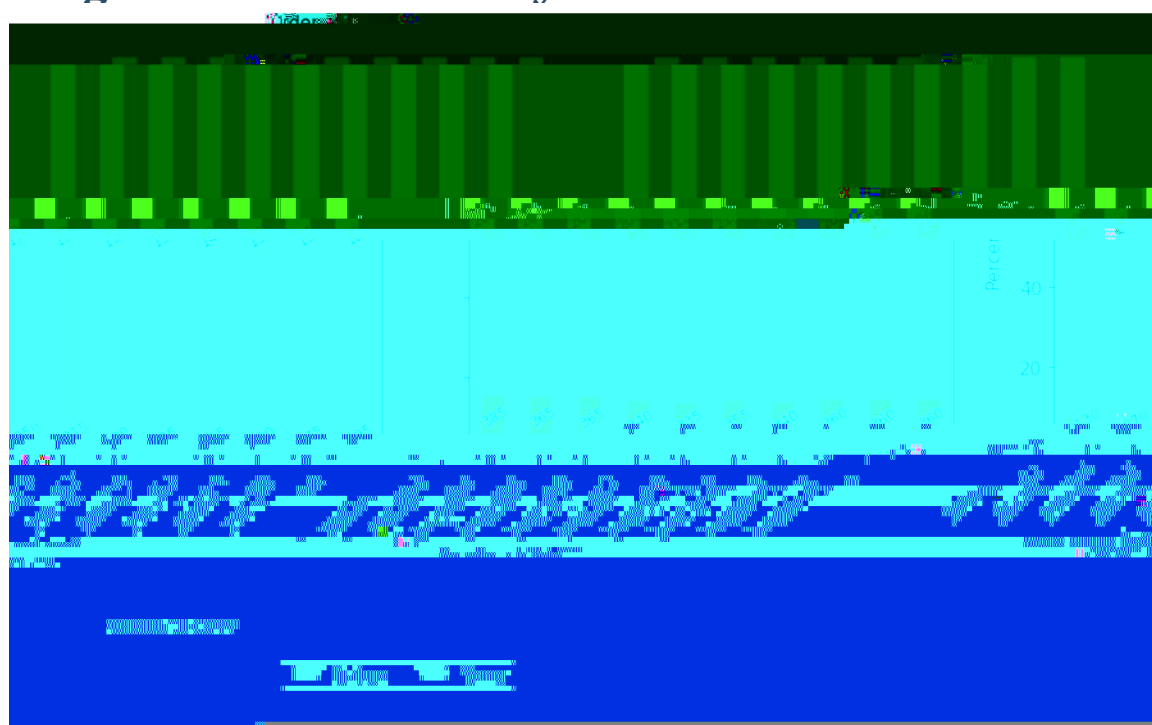

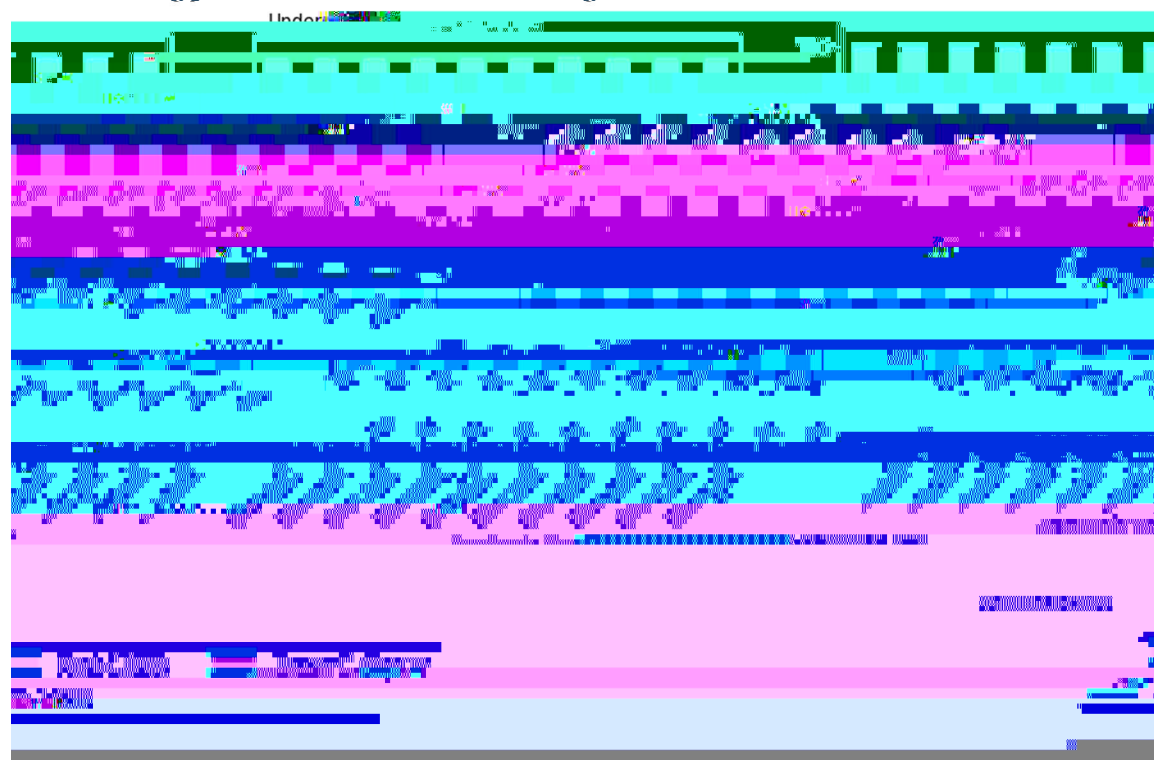

## Socio-economic classification of UK domiciled chemistry students

## Young/mature UK domiciled chemistry students

## Institution type of UK domiciled chemistry students

## Institution region of UK domiciled chemistry students

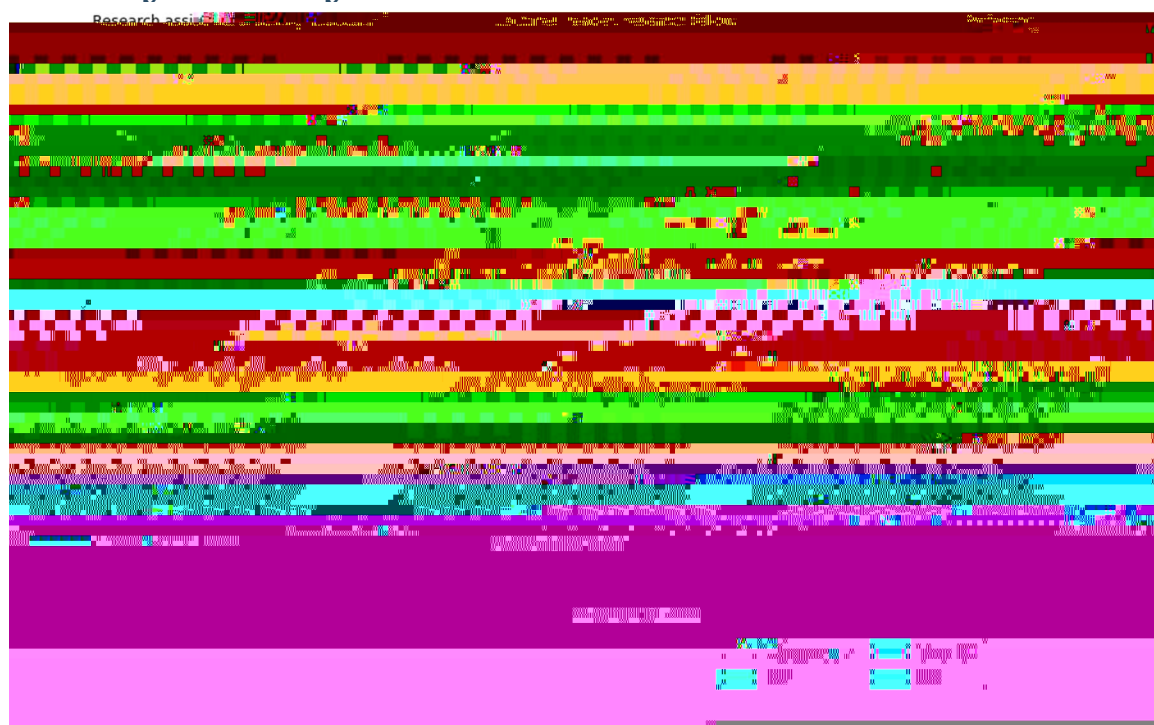

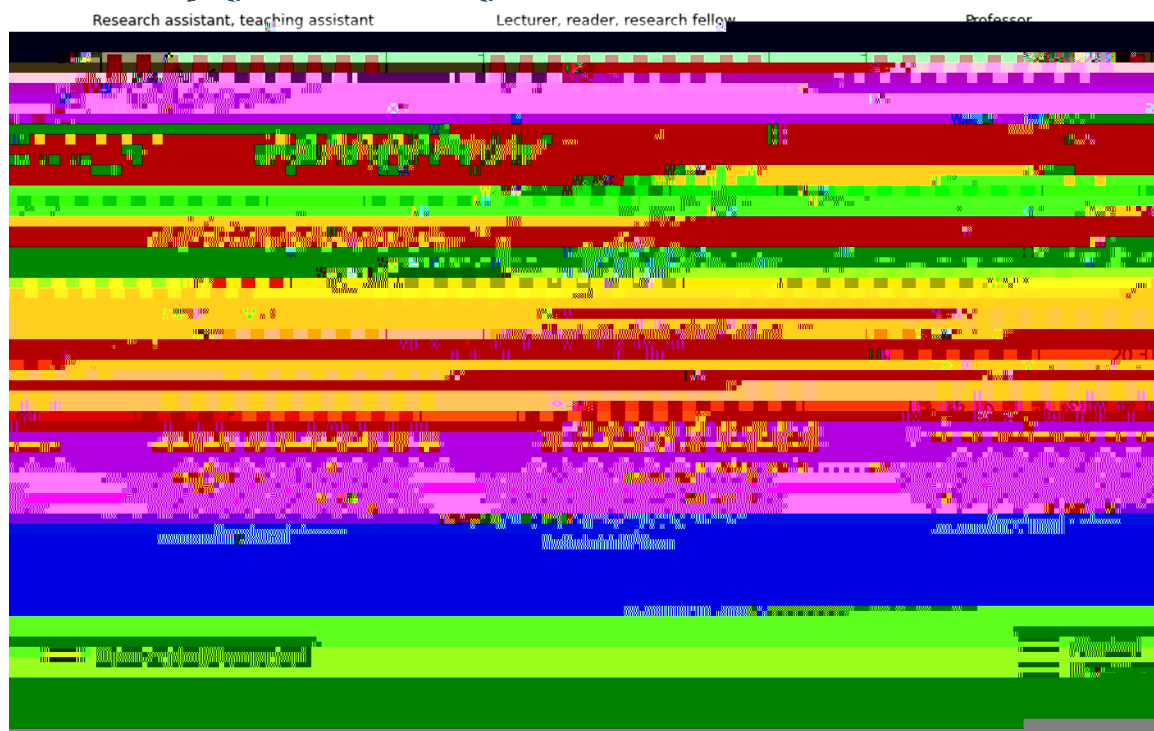

# What are the demographics of chemistry staff by “contract level” at UK higher education institutions?

## Nationality of chemistry staff

## Terms of employment of chemistry staff

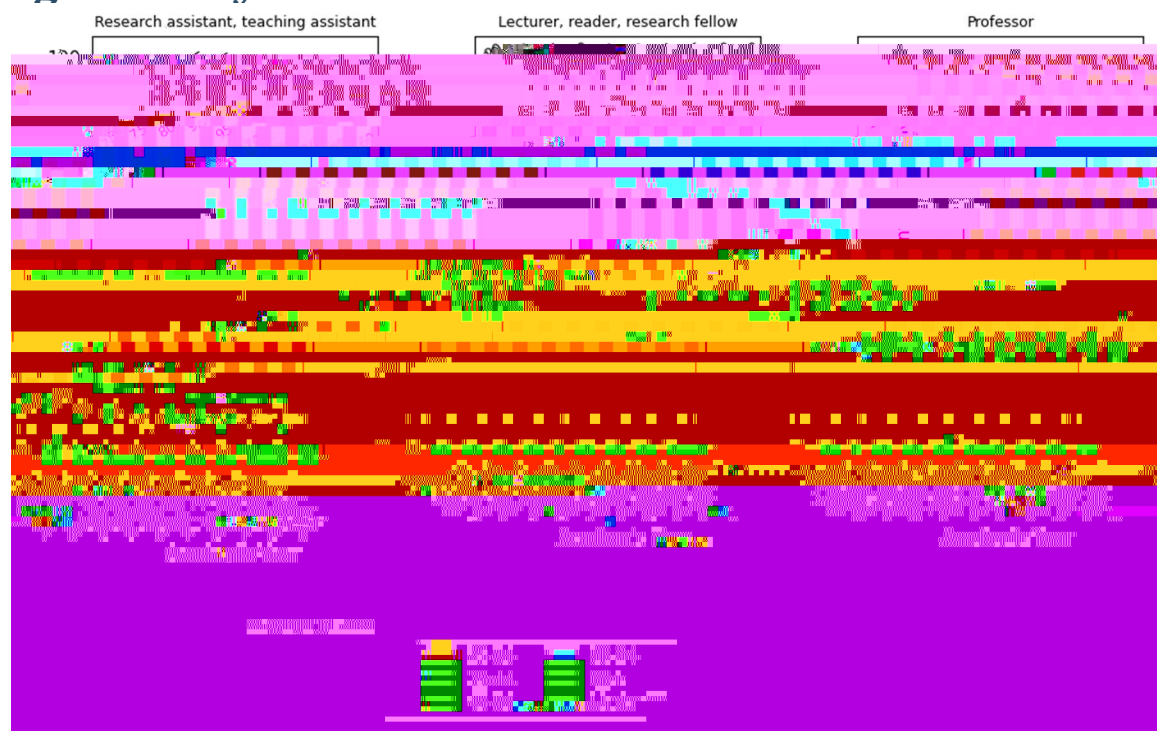

## Academic employment function of chemistry staff

## Age of chemistry staff

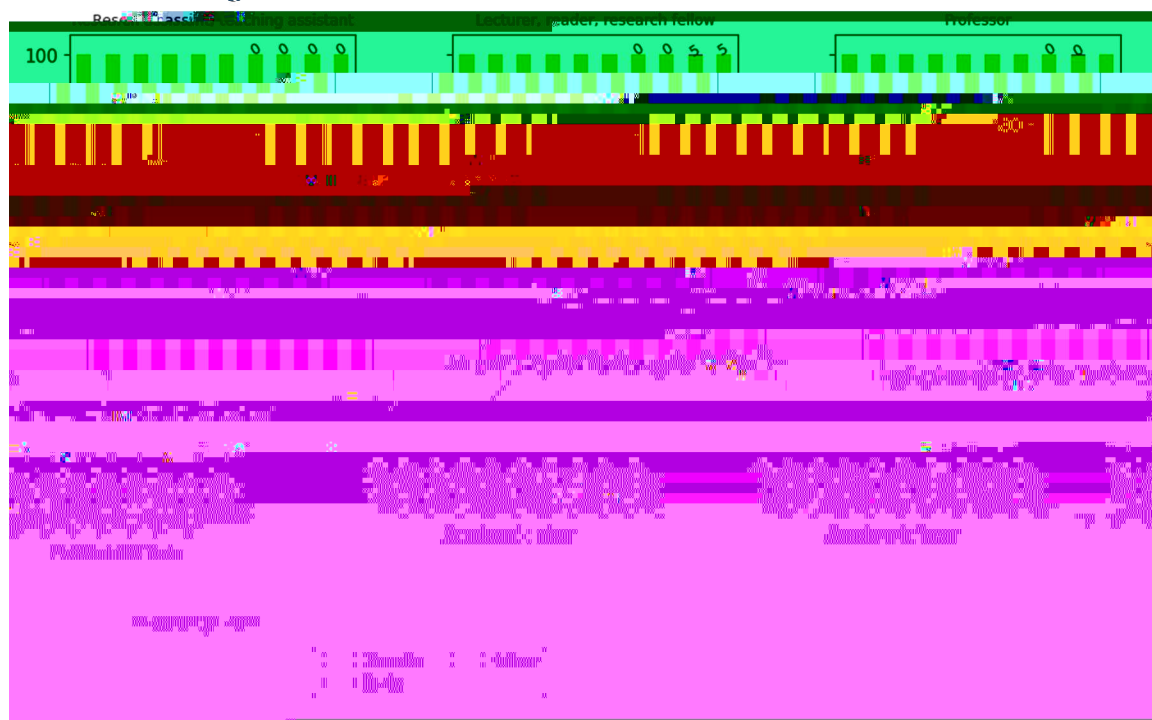

## Institution type of chemistry staff

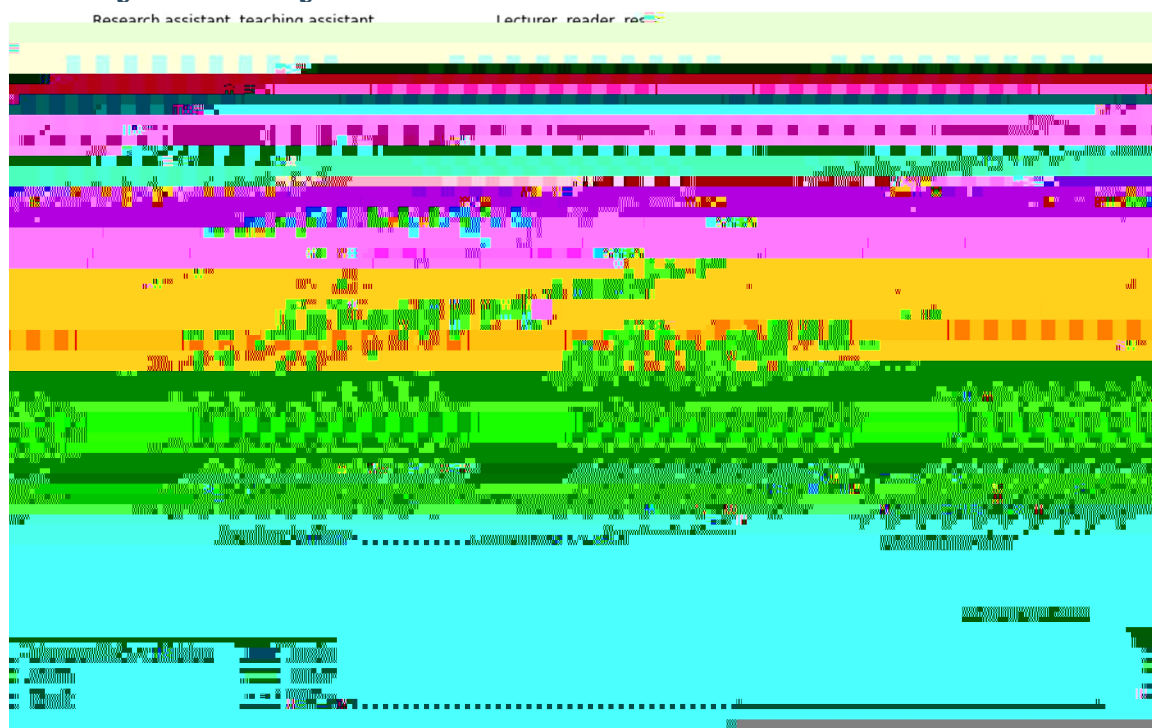

## Institution region of chemistry staff

## Sex of chemistry staff

## Ethnicity of chemistry staff

## Footnotes

1. Student numbers are based on the summed **FTE (Full Time Equivalent)** values of the Student dataset, years 2012/13 to 2021/22. The following filters have been applied:

“**Subject of study (Principal subject IACS 30 (2012/13-2018/19))**” includes only “(F1) Chemistry” or “**Subject of study (CAH9 (2019/20 onwards))**” includes only “(CAH7-02 01) chemistry”

“**Session population maker**” includes only “The instance is counted within the HE session population”

Some HESA diversity characteristics are only populated for students with UK domicile, so all of the breakdown graphs apart from that showing “Domicile” are filtered to only show UK domiciled students

“**Institution type**” has been determined by mapping “**HE provider**” onto the groups “Russell Group universities”, “Non-Russell Group universities” (“1992-2000” and “Post 2000”) or “Post 1992 universities” (“1960-1991”, “1600-1959” and “Before 1600”).

“**Institution region**” has been determined by mapping “**HE provider**” onto the groups “South East”, “London”, “Scotland”, “West Midlands”, “East”, “South West”, “East Midlands”, “Northern Ireland”, “Yorkshire”, “North West”, “Wales”, “North East”.

2. Staff numbers are based on the summed **FTE (Full Time Equivalent)** values of the Staff dataset, years 2012/13 to 2021/22. The following filters have been applied:

“**Academic employment function**” includes: “Academic contract that is both teaching and research”, “Academic contract that is neither teaching nor research”, “Academic contract that is research only”, “Academic contract that is teaching only” but excludes: “Unknown”, “Not an academic contract”

“**Cost centre**” includes: “(11) Chemistry” and “(113) Chemistry”
